

# README

## Run Instructions:

For directed data, run:

```
python pageRank.py <datapath> directed
```

For undirected data, run:

```
python pageRank.py <datapath>undirected
```

Change directory to downloaded directory and run above commands.

## Dependencies:

Igraph, Scipy, Numpy, Matplotlib and NetworkX need to be installed in order to execute above code. This is a simple matter of pip installing the above packages.
